

John Andrews

**Advanced Iridology Class
Cape Town, Felke Institut South Africa
18th August 2006**

*** Endocrinology & Iridology Overview – 2 hours**

A comprehensive synopsis of results from new research and application in the combined fields of Iridology & Endocrinology, covering the endocrine interpretation of established iris signs, together with new research featuring diagnostics and therapeutics touching upon the Hypothalamic-Pituitary-Adrenal Axis, Thyroid function, Adrenal fatigue, Gastrointestinal endocrinology, Pituitary Research, Endocrine role of the liver, endometriosis, uterine fibroids, Progesterone deficiency, testosterone imbalance, Psychoneuroendocrinology (PNEI) and much more with in-depth analysis of the collarette, lacunae, transversals, pigments & embryological topography.

*** The Inner Pupillary Border & the Endocrine System – 1 hour**

Identifying how endocrine conditions in the patient or genetic history can be identified from general structures & specific morphologies of the Inner Pupillary Border (IPB). A lavish gallery of IPB signs will be linked with their meaning and treatments. John will present in South Africa new material in this field utilising the latest technologies in Iridology.

*** Polycystic Ovary Syndrome Profiles in Iridology – 1 hour**

This will be a comprehensive overview of the increasingly frequent Polycystic Ovary Syndrome or PCOS – symptoms, aetiology, iridology profiles & productive natural therapeutics. The iris & IPB signs are based on research with research with over 60 PCOS patients.

**Endocrinology in Natural Medicine Congress Lectures
19th & 20th August 2006 Cape Town**

Identifying Tendencies to Blood Sugar Imbalance through Iridology – 1 hour

Erratic blood sugar levels can be the direct cause of a multitude of seemingly unrelated and “mystery” symptoms that are perpetuating health problems. The health of the endocrine system is inter-dependent on balanced blood sugar levels. Research with over 1,500 patients has revealed that Iridology is a reliable tool for assessing erratic blood sugar tendencies and how severe they can be both genetically and for the individual. A gallery of images combines with natural protocols for regulating erratic blood sugar.

The Amazing Role of Prolactin

– Iridology Profiles & Natural Therapeutic Profiles – 1 hour

Prolactin is often overlooked or misunderstood in iridology, natural & general medicine, yet it has a deep and profound influence on our physical and emotional health. Far from being just a hormone involved in lactation – prolactin imbalance can create numerous conditions and symptoms influencing the response to stress, immunity, fertility in both sexes, the endocrine system & much more. This presentation will look at the reliable iris & pupillary signs indicating prolactin balance, symptoms of hyperprolactinaemia, aetiology and natural treatments for prolactin imbalance.

John Andrews is the author of the 2006 book on Endocrinology & Iridology. He has also written the critically acclaimed books on Immunology & Iridology, Emotional Approaches in Iridology, Embryology & Iridology & Iris & Pupillary Signs, 2nd Edition. John is the Editor of the Advanced Iridology Research Journal and over 20 research papers on Iridology.

John is internationally recognised for his combination of innovation and scientific application in Iridology and was awarded with the Ignatz Von Peczely Award in Brazil in 2004. He lectures and teaches on four continents.

He is in private practice in Northern England combining iridology with herbal medicine, nutrition, Colourpuncture and other natural therapeutics.

During the Advanced Class & Natural Medicine Congress John will present a synopsis of his latest book together with advances since writing Endocrinology & Iridology.
