

John Andrews Iridology

Advanced Iridology Research Journal E-Newsletter

November 2006
www.johnandrewsiridology.net

Introduction

Hello & welcome to the November edition of the www.johnandrewsiridology.net e-newsletter. We wish you all well and hope that there is something of interest in here for you. We have been incredibly busy in recent months and John's schedule has been at full tilt. However, we have been working on a full programme of media, events, offers & requests.

Website

The website itself has been updated & expanded – with numerous additions. Amongst these is included the release,

finally, of the Instructional CD Series, addition of articles, the availability of the Advanced Iridology Research Journal Volume 6, free downloads, the ebb & flow of student resources downloads & seminar & lecture dates & details for John in 2006-2007.

Between now & February 2007 the website will be expanded further with even easier and clearer navigation around the site, the first additions to the long-awaited Iris Image Gallery, new publications & Series 3 of the Instructional CDs from John Andrews. We will also have further confirmed details on more international & domestic lecture/seminar dates for John throughout 2007-2008 & by popular request, a Reviews Section for the text-books, seminars & CDs to assist others in what to

purchase, download or attend.

There is a typo on the website at present, the title of the “Polycystic Ovary Syndrome, Uterine Fibroids, Endometriosis & Iridology profiles” Instructional CD should actually read as “Polycystic Ovary Syndrome & Iridology Profiles” – the Fibroids & Endometriosis subjects are to be covered & released on a CD of their own mid-2007 in Series 4 of the Instructional CDs. Apologies for any confusion with this issue.

New Modern Iris Chart

For the next 30 persons completing one transaction for Series 1 & Series 2 of the Instructional CDs we will be sending one free, new & modern iris wall chart by John Andrews – larger size - to be published April 2007. Don't delay – order your CDs today!

Instructional CDs

Series 1 & 2 of the Instructional CDs are finally released.

John has been staggered by the international response to date. Pre-orders received over recent weeks have been enthusiastically received, to say the least. If you click on the CD-ROMs section on the website's Homepage you will be taken to the section where all the info on the content, technical details, prices & secure purchasing information is situated. The CDs offer excellent value for money, as you can see from the number of slides & MB contained in each CD. The CDs are compatible both with PCs & Apple Mac. The quality of both the instructional information and quality of iris image is second to none in the world at the present time. The Instructional CDs also compliment & expand upon John's published & unpublished body of work to date & his lectures & seminars.

You can purchase the CDs on an individual basis if you wish, although many take advantage of the very generous offer of all six CDs in Series 1 or Series 2 for the price of 5. So in essence you gain one free CD each series – but to take advantage of this offer you have to purchase either a complete Series 1 or Series 2 in one immediate transaction.

Many teaching courses have asked to show these CDs to their current or previous trainee iridologists, due to the depth, quality, clarity and new information present. Permission to show these has been granted in certain cases, but written permission must be sought to transmit this information in any form.

A further Series 3 of the Instructional CDs will be released at the end of the January 2007. With the aforementioned Series 4 available mid-2007.

Introduction to Iridology

180 slides 120MB

Subjects covered include Iridology history overview, prominent iridologists & their work throughout the world, Topography, iris chart examples, outline of modern iridology training essentials, brief constitutional types, Iridology myths & challenges, iris textbooks, what we cannot detect through iridology, neuroendocrine pathways & the iris, the importance of the hypothalamus, lateral geniculate bodies & the iris, aniridia, the iris used in biometrics, the stress axis, thyroid axis, depression axis, iris development, iris pigments, spinal analysis & iridology, sections of the eye & the iris, iris signs introduction, embryological development of the iris, transversals & much more.

Differentiation of Lacunae & Crypts

159 slides 96MB

Interpretation of the lacuna & crypts, genetic footprints, which organs or tissues do not produce lacuna in the iris, frequency of the topographical location of lacuna in the iris, differentiation of the following lacunae - closed lacuna, open, one-sided, rhomboid, lacuna with crypt, lacuna with pigment, lacuna with collarette indentation, solitary collarette lacuna, Endocrine/Polyglandular types, jellyfish, asparagus, beak, giant, thymus, adrenal, ovary, thyroxine lacuna, shoe, heart, silver fibre, staircase, internal lacuna, cryptoids, daisy petal, double, divided, distorted, torpedo, circular, leaf, negative & more.

The Pupil in Iridology

122 slides 50MB

Differentiation of mydriasis, miosis, Anisocoria, idiopathic alternating Anisocoria, hippus, pupil ellipses, pupil tonus, Coloboma, white pupil syndrome, cat's eye pupils, wedge-shaped pupils, raised pupils, circular pupils, plus what is the pupil, normal values of the pupil, the most prominent pupil types, Axenfeld-Reiger Syndrome, emotional & physical dynamics of all.

Miscellaneous Iris Signs

156 slides 102MB

The following peripheral, solitary or transient iris signs covered in detail include Mammilations, pupil shadow ring, Brushfield's spots, Lisch nodules, white radials, vascularised vessels, vagus nerve signs, Ciliary neuron networks, pupillary zone neuron networks, differentiation of contraction furrows, skin rings, stromal rarefaction, fish hooks, helix vessels, gastric rings, visible pupillary sphincter, corkscrew vessels, combed hair vessels, radial furrows, lymph cords, iris veins, the mesenchymal acid barrier signs, therapy resistance, Brushfield's spots transversals, white pupillary sphincter, emotional dynamics, vessels & ophthalmology plus much more.

The Collarette

160 slides 165MB

The integrity of the collarette is covered in detail with the multiple dynamics associated with restricted collarette, various types of distended collarette, zigzag, partial zigzag, local indentation, cat's ears, linear, pigmented, mixed, sea foam collarette, squared collarette, frontal indentation, DNA predominance, emotional dynamics, vascularised collarette, collarette point, triple, double, bridges, Koch's sign, atrophy, thin or hypotrophic collarette, hypertrophy, funnel sign, protuberance, Arched collarette, epigenetics & new research with the collarette.

Emotional Approaches in Iridology

160 slides 170MB

Overview of emotional approaches in iridology, pioneers in the field, identification of mother & father conflicts, differentiation of time risk signs, emotional dynamics of the lacuna, pigments, collarette, Brushfield's spots, central Heterochromia, white radials, transversals, the structure of water & the eye, identification of betrayal, anger, resentment, etc from the iris & much more.

Hypoglycaemia & Iridology – Balancing Blood Sugar Levels

170 slides 162MB

Extensive exploration based on research with 1500 clinical cases – there are overviews & specifics with research, plus blood sugar signs & symptoms, embryology, treatments, iris, IPB, scleral signs based on the research. Lavishly illustrated throughout – the work presented here, like so many of John's lectures, has been well received throughout the world.

Polycystic Ovary Syndrome & Iridology Profiles

80 slides 50MB

This is an extensive exploration of all facets of the increasing incidence of Polycystic Ovary Syndrome (PCOS) with iris & inner pupillary border signs, pupillary dynamics & treatment protocols.

Spinal Analysis in Iridology

60 slides 70MB

The supposed ciliary iris spine topography has proven to be unreliable & insignificant as a method of assessing & identifying neuromuscular spinal problems or injuries. The Inner Pupillary Border is a more reliable method of identification. Combined with the pupil, the IPB points to a dynamic & accurate interpretation for the practitioner. Charts, signs & new research are all covered & this instructional CD is ideal for iridologists & for all involved in structural or physical therapies.

Differentiation of Iris Pigmentation

120 slides 140MB

Life & the eye are full of colour – but we need to have in-depth knowledge of the iris pigment development, location & differentiation. This CD helps to challenge myths about iris pigmentation. Pigment types covered include brown, orange, yellow (differentiation of dysbiosis, splenic, renal, histamine & EFAs factors), black, punctate/peppercorn pigments, spleen pigments, Pathochromia (“Psora”), central heterochromia, sectoral heterochromia, pigments & pain, medical reasons for changes in eye colour, prominent topographical location of iris pigments, hedgehog pigment, bush pigment, waterfall pigment, solitary pigments, pigments with other signs, emotional qualities of the pigment & much more.

Transversals in Iridology

80 slides 90MB

Transversals are one of the most important peripheral, Ciliary or miscellaneous iris signs, hence an instructional CD of their own. Transversals covered include fork, antlered, tent, vascularised, hepatic, spleen, spleen-heart, blue, root, sack, criss-cross, wedge-shaped, exudative, Brushfield's spots transversals, roof, fountain, intestinal, superficial, multi & deep branched, meander, uterine, submerged, curved, connecting & emotional dynamics.

Introduction to the Inner Pupillary Border

150 slides 170MB

John Andrews is considered a global authority on the Inner Pupillary Border. This CD is an in-depth and comprehensive intro to provide accurate analysis of the Inner Pupillary Border (IPB) – the emerging future of Iridology!

Topics covered include anatomy, neural connections, overview of the IPB, pioneers in IPB research, differentiation of IPB diameters, IPB pigments, IPB pigment dispersion syndrome, Psychoneuroendocrinoimmunology, epigenetics, IPB topography, differentiation of IPB morphologies such as claws, pearl, wave, globular, the importance of the frontal IPB structure, neurolappen, omega, fence-post, squared, button hole, blood sugar, anchor, borderline, double, absent section, detached IPB, triangles, undulation, S sign, M sign, V sign, tonsil sign, osteoarthritis signs plus much more.

Amazing CD Offer

We have an incredible CD offer for the first 20 people to purchase a complete Series 1 AND Series 2 in one transaction – you will receive free of charge the attendance fee at the International Advanced Iridology Research Seminar with John Andrews & others (in Manchester, England – to be confirmed for 29th, 30th June & 1st July 2007) or similar. Note that cost of the seminar does not include your accommodation or travel costs.

If you are one of the first 20 you will receive notification of this via email as soon as your order is completed – vouchers will be emailed out in January 2007.

New Iridology Chart by John Andrews

Over the last couple of years it has become increasingly obvious to John that a coordinated & modern chart of Iridology has to be made available, especially in regards to John's Iridology Courses & the deviations to standard charts in English, plus additions discovered during the course of John & colleagues research over the years.

By popular & international demand a new, modern & comprehensive chart of Iridology will be made available in different formats. The iris chart will feature the “maps within maps” John has become known for across the globe.

Iris charts will be available on an individual basis & also to those providing training courses. Email to be informed of developing details. The charts will be available in several languages by the end of 2008.

Advanced Iridology Research Journal News

The latest Volume 6 of the AIRJ is now avail-

able through the www.johnandrewsiridology.net site. Click on the Publications section & navigate to

the relevant section by clicking on the Advanced Iridology Research Journal. You can subscribe online or simply acquire one single copy. Contents information is available from the site, but Volume 6 features contributions from Dr Mikhail Dailakis, Dr Javier Salome, Dr Daniele Lo Rito, Prof Serge Jurasunas, John Andrews & many others.

Subscriptions

How the AIRJ Subscriptions operate are in the process of change. If you have an existing subscription this will be fulfilled as per normal, but if you prefer to receive on CD or via Download from the site, please let us know as you will receive a free smaller sized version of the New Iridology Chart by John Andrews if you email & choose either the CD or Downloadable version.

In future for new or updating subscribers from the 1st December 2006 the AIRJ will only be available in CD or Download format.

This drive is to keep costs low, increase frequency of publication, increase amount of content for each volume and reduce paper, inks, carriage and production costs, but ensuring you as a valued subscriber receive more for your investment to further your Iridology information & insight.

AIRJ Volume 7

The next volume is to be published in February 2007 and will feature the following:

- Exciting Iridology Research from Belarus
- Chinese Iridology Research
- Progesterone Imbalance Tendencies & Iridology Profiles – New Exhaustive Research Work by John Andrews (follows on the theme of “The Amazing Role of Prolactin” chapter in the “Endocrinology & Iridology” book)
- Frequency of Location of the Lacuna in the Iris – where do the lacunae appear the most?
- The Spleen by Dr Claus Jahn
- Injury to the neuromuscular & spinal lumbar – 8 year study profiling the pupil & IPB dynamics
- International Nomenclature Standard – A beginning
- Current, proposed & Recent Iridology Research Abstracts
- Advanced Iridology Research

And many more features to be announced in January

Contributions

The way we receive submissions for contribution to the AIRJ have changed.

The text must be submitted with the following stipulations:

- Pages Document
- Word Document
- All text formats must be have Headers of Helvetica & Body text of Times
- All text must be emailed & accompanied with a Biography
- All text must be in English language
- Supporting graphics or photographic images must be in jpeg or tiff formats – RGB colour scale & posted on a CD or Memory Stick
- It has to be accepted that some of the graphics or text content could be published on the www.johnandrewsiridology.net website

Documents/Graphics in any other format cannot be accepted for publication.

These changes will further streamline the production of the AIRJ & save us a lot of valued time – if you have recently submitted in any other format please resubmit.

Contributions for Volume 7 & Volume 8 are invited.

Holistic Iridology Training Course with John Andrews

The current training programme is well underway and the next one begins in January 2008 and is due to be completed in April 2009. The updated Prospectus CD for John's Training Course will be available from early January 2007. Please email with your postal address to request a copy if we do not already have you on our growing list. Numbers are limited on the course to maximise the contact time with John.

Iridology Course Modules

Previous graduates or students of John's Training Courses, other schools in the UK & overseas are welcome to attend individual events during the course that we advertise – these can be paid for via the website. They contribute 8 hours to your CPD points & also enhance your understanding of Iridology & how it is practiced. The forthcoming "The Integrity of the Collarette" on Saturday 27th January 2007 & "Miscellaneous Iris Signs" on Saturday 25th November 2006 are the two most recent available. All participants receive a CD of the day's presentation – but spaces are limited so please email ASAP to reserve your place. We can provide you with the accommodation close to & travel details to John's clinic.

Details of other such modules are featured on the site for the remainder of 2007.

John Andrews Iridology Training Modules 2006-07

Open to all current undergraduates, previous graduates, students of other colleges & practitioners – see end of section for payment details.

All attendees receive CPD certificate, CD of the day's presentations & a wealth of new information. Each module runs from 9.30am-5pm.

- Saturday 30th September 2006
Iris Topography & Iris Pigmentation Introduction
- Saturday 28th October 2006
Differentiation of Lacunae & Crypts
- Saturday 25th November 2006
Miscellaneous Iris Signs, Contraction Furrows Differentiation & Transversals
- Saturday 27th January 2007
The Integrity of the Collarette
- Saturday 17th February 2007
The Pupil in Iridology & Advanced Iris Pigmentation
- Saturday 17th March 2007
The Importance of the Axis in Iridology. Elaboration on Constitution, Disposition & Diathesis in Iridology
- Saturday 21st April 2007
The Inner Pupillary Border
- Saturday 19th May 2007
New Topographical Research - Embryology & Iridology, plus Immune Profiles
- Saturday 23rd June 2007
New Perspective on Emotional Approaches in Iridology
- Saturday 14th July 2007
Colourpuncture & Iridology
- Saturday 15th/22nd September 2007 (TBC)
Mock Examination & Scleral, Conjunctive & Corneal Signs
- Saturday 27th October 2007
Clinical Applications in Iridology Tongue & Fingernail Visual Analysis

- Saturday 24th November 2007
Clinical Applications in Iridology
- Saturday TBC early December 2007
Final Examinations Class 2006-07

All Module Fees are £94 (inc VAT)

Pay for any Module now.

Also TBC 2007:

- Modern Herbal Medicine for Iridologists Module 1
- Modern Herbal Medicine for Iridologists Module 2
- Homotoxicology & Iridology
- Dried Blood Analysis, Iridology & Optimum Detoxification Profiles with Dr Etienne Callebout & John Andrews in Leeds, West Yorkshire.

Other Iridology Courses - New

In January 2007 the website will finally have details of the new Advanced Iridology courses available through the site to gain correspondence & professional qualifications on an international basis. The topics covered will include:

- Qualification in Inner Pupillary Border Study
- Qualification in Pupillary Dynamics in Iridology
- Advanced Iridology Practice
- Immune System & Iridology
- Endocrinology & Iridology

International Seminars

John has numerous international congress & advanced seminar events confirmed & many are to be released over the coming months. This newsletter has details of the two 2-day seminars in USA 2007 – one in Charlotte, NC & one in Las Vegas in June respectively – we also have comprehensive information on the 4th Annual International Iridology Seminar with John Andrews hosted in Kilkenny, Ireland for September 2007.

These events are proving immensely popular & we advise contacting the organisers of the individual events to confirm your interest &/or place in the very near future.

Emotional & Physical Dynamics of the Collarette

Advanced Iridology Seminar Part I with

**John Andrews
at the Alexis Park
Hotel, Las Vegas,
USA**

**Wednesday 6th &
Thursday 7th June
2007**

Following the hugely successful advanced seminar in Charlotte, August 2006 John will expand on some

of the new research & practice in Iridology with the focus on the Collarette (ANW) & how this can clarify & expand our knowledge about the patient on multiple levels of interpretation. Psychoneuro-endocrinology, embryology, the Limbic system, epigenetics & many other dynamics will be explored. All attendees receive certification & a seminar CD. This seminar takes place right before the IIPA Congress.

John is also a keynote speaker at the following events in 2007 too:

- A Comprehensive Overview of the Inner Pupillary Border - The Future of Iridology, Saturday 24th March 2007 at the Guild Of Naturopathic Iridologists International Symposium, Institute of Child Health, London
- Eighth Annual International Iridology Congress of America - 19th to 21st October 2007 - John Andrews Original Research Presentation - Marriott Airport Conference Hotel, Cincinnati, Ohio, USA

Please refer to website for further information

Hypoglycaemia, Adrenal Dysfunction & Iridology - Comprehensive & Advanced Profiles

**Advanced Iridology Seminar Part 2 with
John Andrews**

**at the Renaissance Suites hotel, Charlotte,
North Carolina, USA**

Sunday 5th & Monday 6th August 2007

John Andrews is known for his in-depth knowledge, experience & research with all facets of blood sugar balance & adrenal gland function in relation to Iridology & how this can be applied to enhance the practitioner's clinical expertise, confidence and practice. By popular request John will present comprehensive profiles from the basics to the advanced through all the signs, symptoms & treatments for optimum blood sugar balance & adrenal function. Adrenal & blood sugar problems are growing in the UK & the USA, many times these foundations to a person's health are overlooked, to the long-term detriment. The new information shared during this seminar will ensure that this won't occur with you, your patients & clients. Attendees receive certification & a seminar CD.

John will also be a keynote speaker on Friday 3rd & Saturday 4th August 2007 at the New Sun Annual Natural Health Convention at the Renaissance Suites Hotel, Charlotte, NC.

**For both USA seminars
please contact
MDJones@iridology.com**

International Iridology Seminar in Ireland 4th Annual Advanced Iridology Seminar with John Andrews

**Saturday 29th &
Sunday 30th September 2007**

Kilkenny, Ireland

By popular demand topics will include in-depth & comprehensive coverage on all aspects of blood sugar levels & iridology, plus the

latest research in iridology with a focus on how to identify priorities within the iris analysis to gain clarity for both the practitioner & patient. According to the feedback from the 2006 seminar the information John presents with such clarity, warmth, depth of information & practical understanding has “stretched the boundaries of what is possible with iridology”

Email jerrygardner@eircom.net for further information & watch this space for full programme, payment options & further details.

Publications

The current textbooks by John Andrews include four titles. If you have not read or acquired a copy of the “ground-breaking”, “wonderful”, “inspirational” 2003 book “Immunology & Iridology” –

then please do so soon – as it is due to come to the end of the current print run over the next few months. Many people have considered this book a “modern classic for Iridology” & “helps to clarify a complex subject for any student or practitioner”.

Please visit the site & click on Publications – then order securely online.

Publications 2007

Releases in 2007 will include:

- Series 3 & Series 4 Instructional CDs
- Iridology Chart by John Andrews
- Advanced Iridology Research Journal Volume 7 & 8
- Embryology & Iridology – New Topographical Research in Iridology by Andrews & Lo Rito E-book
- Several articles by John Andrews only available for download via the site with use of a Student Resources Password sent to those who have purchased a book, AIRJ or CD from us in the past
- John’s Magazine Articles

Thanks for your continued support & interest – we hope there is something of interest in here & linked to the site.
